PROFESSIONAL SUMMARY

Product Engineer with strong Flutter experience and hands-on full-stack experience in Next.js, React, TypeScript, NestJS, PostgreSQL, and Supabase. I build mobile and web products end-to-end, including APIs, admin panels, authentication flows, operational workflows, and practical AI features such as search, summaries, retrieval, and workflow automation. Experience shipping production systems across mobile, backend, and product environments.

TECHNICAL SKILLS

- **Front End:** Flutter, Dart, Next.js, React, TypeScript
- **Backend:** Node.js, NestJS, REST APIs, Authentication, RBAC, Background Jobs
- **Database:** PostgreSQL, Supabase, Database Design, Query Optimization
- **AI:** OpenAI API, pgvector, RAG, Structured Outputs, AI Integration
- **Mobile:** BLoC, Riverpod, Clean Architecture, Performance Optimization, Offline-First Workflows
- **Tools:** Git, GitHub, CI/CD, Jira, ClickUp, AWS

PROFESSIONAL EXPERIENCE

Full Stack Product Engineer

Crunch Africa | Johannesburg, South Africa | Dec 2024 – Present

- Built and shipped backend services using NestJS, TypeScript, and PostgreSQL for mobile and web product workflows.
- Delivered REST APIs, async processing, and operational data flows consumed by Flutter apps and Next.js admin tools.
- Integrated practical AI features using OpenAI APIs, structured outputs, retrieval, and pgvector-based search workflows.
- Improved delivery speed and product capability by creating reusable backend modules and clearer operational workflows.

Senior Flutter Developer

Hyperhire | South Korea | Oct 2023 – Nov 2024

- Shipped complex Flutter application features for production mobile products used across multiple time zones.
- Delivered end-to-end feature work across mobile UI, Supabase-backed data flows, and backend-connected workflows.
- Improved real-time sync, screen performance, and reliability in production mobile product flows.
- Worked closely with product and engineering teams to turn requirements into shipped features faster.

Senior Apps Developer

Crunch Africa | Johannesburg, South Africa | Mar 2020 – Sep 2023

- Built and maintained backend-connected mobile systems for consumer-facing applications.
- Delivered APIs and operational workflows that improved responsiveness and system reliability.
- Shipped cross-platform product features across app delivery, backend coordination, and release execution.
- Contributed to real-time and operational product systems used in live production environments.

Full Stack Engineer

GTek Solutions | Lahore, Pakistan | Nov 2018 – Feb 2020

- Built full-stack solutions serving mobile and web clients.
- Implemented backend data services and REST APIs for production applications.
- Delivered mobile implementations integrated with custom backend systems.

Full Stack Engineer

EEIZO IT Solutions | Sahiwal, Pakistan | Sep 2017 – Oct 2018

- Developed and maintained cross-platform mobile applications with backend integration.
- Worked on API consumption, data flow, and product delivery.
- Improved stability and delivery quality in existing systems.

PROJECTS

AI Plant Detetction and Care App

- Flutter, Next.js, TypeScript, NestJS, PostgreSQL, Supabase, OpenAI API
- Built a plant-care product with mobile app, admin panel, custom backend, diagnosis history, and care workflows.
- Added practical AI features for diagnosis support, recommendations, and follow-up workflows.

NurseLife

- Flutter, Supabase, PostgreSQL
- Delivered mobile product workflows, backend-connected features, and operational system improvements.
- Improved reliability and usability for production healthcare-adjacent workflows.

CarPool

- Flutter, REST APIs, Real-Time Workflows
- Built and shipped mobile features connected to live backend and operational workflows.
- Contributed to real-time product behavior and delivery-focused system improvements.

Sabroso Pakistan App

 Flutter, REST APIs, Payments, Order Workflows

- Developed a high-volume food ordering and delivery application for a major restaurant brand using Flutter.
- Built customer-facing ordering flows, transaction handling, and backend-connected delivery workflows focused on reliability and smooth checkout experience.

BreadEx App

 : Flutter, Inventory Integration, Payment Gateways, Real-Time Order Tracking

- Engineered the customer-facing grocery and retail mobile app using Flutter.
- Integrated inventory-aware ordering, payment workflows, and real-time order tracking to support a smoother purchasing and fulfillment experience.

Mulavip Rentals App

: Flutter, Booking Management, Payment Gateways, Real-Time Availability

- Built a rental platform mobile app with booking management, payment integration, and live availability workflows.
- Improved user engagement by 30% through a more complete booking experience and clearer real-time rental availability.

NFT Membership App

: Flutter, BLoC, Secure Transactions, Membership Workflows

- Developed a Flutter membership application using the BLoC pattern for scalable state management and secure transaction flows.
- Supported 10,000+ users and achieved a 4.8-star Play Store rating through reliable membership and transaction features.

LEADERSHIP & COMMUNITY INVOLVEMENT

- **Technical Authority (Stack Overflow):** Built recognized expertise in Dart and Flutter with 7,235 reputation and broad developer reach through technical problem-solving and knowledge sharing.
- **Open-Source & Mentorship:** Contributed to Flutter-related open-source work and mentored developers in Flutter, Dart, and practical mobile engineering patterns.
- **GDG Live Pakistan (Core Team Member):** Organized community initiatives, technical sessions, meetups, and online learning events focused on developer growth and modern engineering practices.
- **Team Lead — Remotebase Hackfest:** Led development of Remotewa, a product concept designed to address remote work loneliness through mobile-first user experience and collaborative product execution.
- **Zena Tamkin (Volunteer App):** Built a Flutter-based volunteer platform using free APIs to support women's empowerment in technology through accessible digital experience.
